INNOVATIVE SOLUTIONS WHICH IMPROVE THE PERFORMANCE, SAFETY, EFFICIENCY AND OPERATIONAL COST OF BODY MOVEMENT AND HANDLING IN FUNERAL, MORTUARY AND MEDICAL SCIENCES FACILITIES.

With nearly 60 years of experience, LEEC provides a unique range of mortuary products, designed specifically for Mortuaries and Funeral Directors. A vast majority incorporate the 'Body Handling' concept which was originated by LEEC some 40 years ago.

This unique Body Handling System offers a practical route to eliminate arduous physical effort, repeated body handling, the significant risk of infection, and hazardous practices.

The Enware/LEEC team can offer design advice to ensure an effective solution, thus eliminating many of the pitfalls which can occur and most importantly, making best use of the available space. Many new projects and refurbishment initiatives rely on this specialist knowledge, delivering versatile and cost effective equipment, a total supply & install solution and maintenance service.

Enware's range of tapware, safety and stainless steel products complement LEEC's range providing robust, reliable and fit for purpose solutions that will deliver performance, and whole of life cost benefits.

DESIGN

Our professional design team cover all aspects of Mortuary related design. With many years experience in the design and construction of mortuaries we can offer lay-out and equipment solutions for all project types. As well we can overlay our own mortuary equipment onto architectural drawings supplied, making best use of available space. Our bespoke equipment is designed to fit specific sites and requirements ensuring the facility delivers best practice performance and efficiency.

TROLLEYS

With an increased awareness of labour efficiency and manual handling risks, LEEC have specifically designed all trolleys to cater for single operator transportation. With substantial construction, our trolleys are designed to give many years fault free service to avoid any down time which is critical when running a busy facility.

DISSECTING

LEEC have produced a dissecting bench which is both easy to use and maintain, compact in design and offers remarkable value. LEEC's dissecting benches are manufactured to the highest standard giving them a proven long service life. Every dissecting bench is built to order and is manufactured to each customer exacting specification.

ANATOMY EQUIPMENT

LEEC Anatomy Equipment includes, mobile and fixed dissecting trolleys, rotating anatomy tables, immersion tanks, defleshing machines and prosected parts storage equipment all designed with leading technology and manufactured from stainless steel.

BODY STORAGE SYSTEMS

LEEC refrigerated cabinets are manufactured using high quality insulated wall and ceiling panels cam-locked together to form a space in which to install a refrigeration system to chill down the room to the required temperature. This combines the advantages of space saving, energy efficiency and improved safety.

INSTALLATION

Enware's professional team of experienced installers will ensure equipment is operational in the shortest possible time frame and as we manage the whole project to ensure that all requirements are met.

We work closely with our clients and liaise with all parties to ensure a hassle free installation.

SERVICE & MAINTENANCE

Strict attention to customer service by qualified staff in all departments ensures the highest standard of after sales support.

The Enware team will ensure that all equipment is maintained to the highest standard guaranteeing optimum performance.
